Career Objective

A highly motivated and skilled developer with a genuine passion for emerging web technology. I possess a wide range of skills and thrive in dynamic and challenging environments, continuously seeking opportunities to learn and grow. Driven by setting new goals and making a positive impact.

Education

CHAITANYA ENGINEERING COLLEGE

June 2026

Bachelor of Technology in AIML (Pursuing)

Vishakapatnam, AP

- **Relevant Coursework:** Data Structures and Algorithms (Python, Java), Prob & Stat in CS (Python), Data Analysis / Machine Learning (Python)

Experience

Smart Internz With MongoDB

May 2026 – June 2026

Full Stack Developer Intern

- Implemented microservices architecture using Node.js and Express, improving API response time by 25% and reducing server load by 30%.
- Led a cross-functional team in implementing a new feature using React and Redux, resulting in a 20% increase in user engagement within the first month.
- Optimized MySQL database queries, reducing page load times by 15% and enhancing overall application performance.

Vault Of Codes

June 2026 – July 2026

Web developer Intern

- Developed responsive and user-friendly web pages using HTML, CSS, and vanilla JavaScript to improve UI/UX for client-facing sites.
- Implemented dynamic features such as form validations, animations, and interactive elements to enhance user engagement.
- Gained hands-on experience with version control (Git), browser compatibility, and web performance optimization.

Projects

Free Lancing Website | React.js, Node.js, MongoDB, Express.js

- Built a full-stack freelancing web application enabling users to create profiles, post jobs, and apply to freelance gigs using React for frontend and Node/Express with MongoDB for backend data handling.
- Integrated secure user authentication using JWT and implemented role-based access control for freelancers and clients.
- Designed RESTful APIs for job posting, user reviews, messaging, and transaction records, improving user workflow and platform usability.

Food Restaurant | HTML, CSS, Js, Node.js, MongoDB

- Developed a responsive food ordering website using **HTML, CSS, JavaScript, and Node.js**, allowing users to browse menus and place orders seamlessly.
- Integrated **MongoDB** for storing restaurant data, user profiles, and order history with secure CRUD operations.
- Implemented a dynamic cart system and order tracking feature using **React** and **Express API**, enhancing the user experience.

Technical Skills

Languages: Python, Java, HTML, Css, JavaScript, SQL, MongoDB

Technologies: React.js, Node.js, Express.js, Bootstrap, TensorFlow

Concepts: Operating System, Artificial Intelligence, Machine Learning, Neural Networks, API, Database Normalization

Declaration: I declare that the information provided is true and accurate to the best of my knowledge and belief.
